

JPM Emerging Markets ESG Equity Fund

Class: JPM Emerging Markets ESG Equity Fund C - Net Income

Fund overview

ISIN GB00BLODTN19	Sedol BLODTN1	Bloomberg JPEMSCD LN	Reuters GB00BLODTN19.LUF
Investment objective: To provide capital growth over the long-term (5-10 years) by investing at least 80% of the Fund's assets in emerging market companies with positive ESG characteristics or companies that demonstrate improving ESG characteristics. Companies with positive ESG characteristics are those that the Investment Manager believes to have effective governance and superior management of environmental and/or social issues.			
Investment approach			
<ul style="list-style-type: none"> • Uses a fundamental, bottom-up stock selection process. • Uses a high conviction approach to finding the best investment ideas. • Seeks to identify high quality companies with superior and sustainable growth potential. • Integrates ESG aspects to identify companies with strong or improving ESG characteristics. 			
BENCHMARK USES			
The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund. The Benchmark will not apply values and norms based screening to implement exclusions that the Investment Manager applies to this Fund.

General Disclosures

Before investing, obtain and review the current Prospectus, Key Investor Information Document (KIID) and the Key Features Document/Terms & Conditions for this fund which are available in English from JPMorgan Asset Management (UK) Limited or at <https://am.jpmorgan.com>.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy

For additional information on the fund's target market please refer to the Prospectus.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See Key Investor Information Document (KIID) for details.

The renaming of JPM Emerging Markets Sustainable Equity to JPM Emerging Markets ESG Equity, effective 03 2025, is in response to the UK Sustainability Disclosure Requirements (SDR).

Performance information

Indices do not include fees or operating expenses and you cannot invest in them.

Information Sources

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Quoted Price The single price at which all client orders are executed.

Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative.

Analyst-Driven % Displays the percentage of Analyst's input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar.

Data Coverage % Displays the percentage of available input data for rating calculation at the Pillar level.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
